## About This Game

### **A breath-taking space exploration experience in Virtual Reality**

Compatible with HTC Vive, Oculus CV1 and DK2.

Discovering Space 2 is all about exploration. There's no action, shooting or explosions, just sightseeing, discovery and relaxation on an epic scale.

*Calming, wondrous and adventurous.*

- Take control of your ship, or follow a tour, and immerse yourself in a journey through the Solar System.
- Feel the awesomeness and remoteness of deep space.
- Experience the mood and atmosphere of worlds far away from home.
- Explore at your own pace, and learn about what you see.

- 
- Come back with a new sense of amazement of what is out there.

Built from the ground up for VR, you have a small space ship and the entire Solar System to explore.

The end result is an experience that conveys the scale, awe and feeling of planetary exploration, in a fully immersive way. You really feel like you are there, and it is at times breath-taking. You can travel vast distances, view the planets (and their moons) from afar, execute some close fly-bys and plunge through their atmosphere down to the surface. Along the way you can listen to on-board commentary that adjusts its content depending on whether you take your time, or just dive straight in.

### **Key Features**

- Vast expanse of the Solar System to explore.
- Easy to use tour mode.
- Easy to use flight controls and navigation.
- Seamless and continuous travel from deep space down to the planetary surfaces.

- Jump gates / hyperspace to allow quick jump to distant systems.

controls where awkward and levels felt very similar and boring. With only 1 episode, I finished the game in under 1 hour on default difficulty. I imagine more episodes were planned but never happened ?

Visuals are ok, but performance isn't as good as it should be, and all the rooms and corridors look the same making it harder to navigate than it should be.

There's a reasonable sense of speed, weapons feel ok to use, and the enemies are ok, but levels are lackluster.

Enemies spawn right out of the walls on top of you, with no audio cue until you're taking damage; and not in an "old school first person shooter" monster closet way, it just feels cheap.

On Android, and for a younger audience who never played 90's shooters, this might be more interesting. But to me it's too short and doesn't offer anything that other FPS on PC don't give you more and better.. Simply put: not worth the price. Basically you're buying the background pictures.. Game has some serious potential. But there is a serious lack of social places, and items. No real reason to play. Players of Playstation home should feel at home. But as of now, alot more work is need. Def worth following, and keeping an eye on. In a year or two time, this game could be something special.. definately worth the 38\$, the jokes are funny, each story potrayed by each love interest is interesting and it's over all enjoyable

the only concern I had really was the few translation errors, but it is overall a 9.5/10 for me, although they should a DLC and add Ruriko's route that would be interesting.

Update: Played through the uncensored version of this game recently, i'd 10000% recommend getting that over the all ages version, & if you don't know how to get there you can easily message me on here & i'll help you out with that. Train Simulator: DB BR Class 232 ein absoluter Fehlkauf diese Lok ist nicht zu gebrauchen die Steuerung funktioniert nicht. Und Hilfe fü00fcr das Problem 0. 14 Euro in den Sand gesetzt danke.. The physics are wonky but not ha ha wonky. This game is quite peculiar. One wanders this Peruvian town, taking photos and talking to the locals. My favourite thing about the game is the haunting atmosphere, and the strangely-immersive world. Playing this in a dark room, with headphones, you truly feel like a foreigner in a distant town after nightfall. The game is buggy and I have no idea how to complete the first part of the quest but I don't mind. Conceptually it's a cool little game, better than most walking simulators out there, and you can tell that the dev was passionate about this project even if it's a janky broken mess. I award it nine-and-a-half Pervian ghost doggos out of ten.. Since I love Astronomy and stuff, I would say this game is a meh. The game isn't that realistic, some textures are not crisp and clean, and things are just not scientifically accurate for it to be called a "Simulator". I was highly dissapointed that I had to pay for the game but I got it on sale, but since I paid I expected better because there are programs that are highly impressive out there for free. My personal favorite, which is highly impressive is Space Engine. But overall, don't bother with this simulator until it reaches its final product and has updates because this is not enough.

I finally finished the game it tooks me about 7 hours.

The graphics are simple and to find all the abilities is a bit tricky but can be done.

What I didn't understand is the five abilities you should get,I only could run ,make my selve small ,and jump so i don't know which the others are.The end is not done well there should be some reward or something else.

If you are an explorer and like easy puzzles try this game. achievement has been broken for months without reply from dev.

Only played 8 yet and already crashed 4 times.. The add on is OK but they have not included any coaches with the 9f so you have to add coaches to the locomotive and secondly they have not included the last 9f 92220 Evening Star which I Believe was asked for by the players.Apart from that it is Ok.. This Game is pretty awesome I had never heard of it. I then watched some gameplay and bought it. It has a sick campaign and a epic multiplayer and its not your call of duty lame style either. It has tacticle moves you need to make to complete a mission and a staggering amount of players allowed in a lobby. You can customize your character completely and the gameplay is polished and very smooth.. Shut up and take my money already!. A bit rough around the edges, but a great "Fallout" type of game. I like the combat and crafting systems, but it can be difficult to earn enough money to make use of the crafting system. I had plenty of raw materials, but I could not afford to buy the recipies for all the items.
